Chapter 8	**Frequently Asked Questions & Owner Troubleshooting**	Page 10

Chapter 1: The Two-Stage Order Pipeline

Vedanya Craft Ghar uses a handcrafted artisan order model rather than an instant impersonal gateway. This protects you from overselling, handles custom modifications, and avoids payment gateway transaction cuts.

Stage	Who Does It	What Happens	Action / Result
Stage 1: Order Request	Customer on Storefront	Customer adds crochet/scrunchies, fills delivery address, and submits order request.	• Instant Provisional PDF generated • WhatsApp deep link opens with pre-filled message • Stock NOT charged or deducted yet
Stage 2: Owner Review & Stock Lock	Artisan Teacher in /admin/orders	You review the order. You can apply a festival discount or adjust delivery fee if remote.	• Click "Approve & Lock Stock" • System locks stock using atomic row locking • Item cannot be sold to anyone else
Stage 3: Payment via UPI / QR Code	Customer & Artisan Teacher	You share your Google Pay, PhonePe, or Paytm QR code with the customer on WhatsApp.	• Customer transfers money • You click "Mark as Paid" in /admin/orders • Revenue is added to your verified dashboard
Stage 4: Handcrafting & Packing	Artisan Teacher at Studio	You handcraft, pack with tissue & care card, and prepare the parcel for courier dispatch.	• Click "Advance Status" to PREPARING or READY_TO_SHIP • Customer can see progress on /track-order
Stage 5: Dispatch & Tracking	Artisan Teacher via Courier	Hand package to India Post, DTDC, or Delhivery. Copy the tracking number.	• Click "Mark as Shipped" • Paste tracking number (e.g. IN123456789) • Permanent inventory deduction occurs

Important Rule: Why Revenue Counts Only After Payment

Your owner analytics dashboard calculates revenue strictly from orders marked PAID or DELIVERED. Unconfirmed pending requests will never falsely inflate your sales numbers. If a customer changes their mind before paying, clicking "Reject/Cancel" instantly unlocks the inventory back to the storefront.

Chapter 2: Logging Instagram & Exhibition Sales

Many artisan sales happen through Instagram direct messages, WhatsApp conversations, or in-person pop-up stalls and exhibitions. The "Log Manual Sale" tool ensures all your sales, customer records, and inventory remain 100% synchronized.

Step	Field / Control	Instructions for Teacher
Step 1	**Open Form**	In the top navigation of the Owner Console, click Orders, then click the "Log Manual Sale" button (or visit /admin/orders/new).
Step 2	**Choose Channel**	Click whether the order originated from Instagram DM, WhatsApp Chat, or Exhibition / In-Person.
Step 3	**Customer Contact**	Type the customer's name, 10-digit Indian phone number, and shipping address. If local pickup, you can type "Local pickup".
Step 4	**Select Products**	Pick an existing item from your catalog (it auto-fills the price) OR type any custom craft description (e.g. "Custom Crochet Bag"). Select variant if applicable, enter quantity, and click "Add".
Step 5	**Shipping & Delivery**	Set delivery charge (defaults to ¹0 for in-person or custom Subtotal and total calculate automatically.
Step 6	**Internal Notes**	Type any private notes (e.g., "Paid ¹500 via GPay advance by Sunday").
Step 7	**Save & Confirm**	Click "Save & Confirm Manual Order". The order is confirmed, stock is deducted, and the buyer is cataloged!

Chapter 3: Product Management & Previews

You can add, edit, or archive products anytime. On the right side of the screen, a Live Storefront Preview card updates in real time as you type, showing you exactly how your product will look on customers' phones.

Field Name	What to Put	Helpful Artisan Advice
Product Title	e.g. "Pastel Daisy Crochet Scrunchie"	Use descriptive, charming names buyers love searching for.
Category	Select Scrunchies, Crochet, etc.	Items appear under the selected category tabs in your shop.
Base Price (₹)	Selling price in Indian Rupees	e.g. ₹249. No hidden taxes or false GST claims
Original Price	Optional strike-through price	e.g. ₹349. Shows a discount tag on the storefr
Availability Mode	READY_TO_SHIP or MADE_TO_ORDER	READY_TO_SHIP: in physical stock. MADE_TO_ORDER: crafted upon order.
Preparation Days	Number of days needed (e.g. 2 to 4)	Informs buyer: "Handcrafted & dispatched in 3 days".
Stock Count	How many you have ready (e.g. 5)	System warns you when stock drops below threshold.
Variants	Colors or Sizes (e.g. "Color: Lavender")	Each variant can have its own price adjustment (e.g. +₹50).
Photo URLs	Paste image web link	Supports high-res craft photos. First photo becomes cover.

1-Click Purge Demo Data Button

Your website came pre-loaded with sample demo crochet items so you could see how the shop looks. When you are ready to launch your real creations, go to Products (/admin/products) and click the red "Purge Demo Data" button. All sample data is wiped permanently with one click!

Chapter 4: Inventory Matrix & Stock Tracking

The Inventory Matrix (/admin/inventory) gives you a single dashboard view of all your physical stock, active orders, and safety thresholds.

Column / Metric	Meaning	Why It Matters to You
Total Physical Stock	The actual count of physical items in your studio drawers.	The true physical count you own.
Locked / Reserved	Units claimed by buyers whose orders you approved, awaiting courier dispatch.	Prevents double-selling! If you have 5 scrunchies and 2 are locked, only 3 are available.
Available to Sell	Total Physical minus Locked.	This is the exact quantity displayed to storefront shoppers.
Health Status	In Stock, Low Stock, or Out of Stock.	Amber badges warn you when you have 3 or fewer pieces left so you can make more yarn pieces.
Quick Adjust Button	Allows instant count updates with a reason.	Click "Adjust", type the new count, and enter a reason (e.g. "Crocheted 4 more pieces"). Recorded in audit log!

Chapter 5: Custom Craft Enquiries & Quotes

Customers love bespoke colors, baby shower gifts, and personalized crochet creations. The storefront includes a dedicated Custom Order Request page (/custom-order). All customer submissions land in your Custom Enquiries Command (/admin/custom).

Action / Feature	How It Works	Artisan Benefit
Sequence Request Number	Every custom enquiry receives a clean ID like VCG-REQ-2026-0001.	Professional reference you can quote in chats.
Reference Photos	Customers can attach reference pictures or describe preferred color palettes.	You see exactly what they envision before replying.
1-Click WhatsApp Quote	Click the green "Send Quote on WhatsApp" button. It opens a chat with the customer containing a polite, pre-formatted message with their enquiry number and your estimate.	Zero manual copy-pasting required.
Convert to Confirmed Order	Once the customer approves the quote, click "Convert to Confirmed Order". It automatically creates an official order, locks materials, and generates an order summary!	No duplicate data entry.

Chapter 6: 1-Click Operating Modes

As an artisan teacher, school exams, workshops, or family vacations require pausing your orders. In your Settings (/admin/settings), you can switch the entire boutique status with a single click!

Operating Mode	Storefront Behavior	When to Use
OPEN (Normal)	Cart, checkout, and custom orders are fully active. No warning banners.	Everyday normal operations.
TEMPORARILY CLOSED (Pause Orders)	Displays an announcement banner. Customers can still browse all your creations, but checkout is politely paused.	When you have reached your weekly crafting limit or during busy school exam grading weeks.
VACATION (Away on Holiday)	Displays a vacation banner with your return date (e.g. "We are on vacation until Nov 20!"). Checkout paused.	During family holidays or traveling.
CUSTOM ORDERS ONLY (Bespoke Only)	Hides ready-stock checkout buttons and invites visitors to submit bespoke custom craft enquiries.	When you have sold out of ready inventory and want to craft only pre-booked commissions.
MAINTENANCE (Under Update)	Displays a tasteful maintenance notice across the storefront.	While reorganizing craft collections or updating prices.

Chapter 7: Customer Directory & Festive Outreach

Every customer who places an order is automatically cataloged in your Customer Directory (/admin/customers). You can view repeat buyers, total lifetime spend, and export clean contact lists for festive greetings.

Capability	Details & Safe Design
Repeat Buyer Ranking	Customers are automatically sorted by Lifetime Spend (calculated strictly from paid/delivered orders). Your top supporters appear right at the top!
Direct WhatsApp Chat Link	Click the green WhatsApp button next to any customer. It opens a chat directly with their phone number to send greetings or exclusive previews.
Formula-Injection Protected CSV Export	Click "Export CSV". It downloads a clean Excel/Google Sheets compatible spreadsheet. All fields are sanitized to protect against spreadsheet formula injection attacks.
Diwali & Festive Campaigns	Use the exported spreadsheet to send personalized holiday discount codes or launch announcements to your past buyers.

Chapter 8: Frequently Asked Questions

Q: A customer placed an order but hasn't sent the UPI payment. What should I do?	A: In /admin/orders, check their phone number and click the WhatsApp link to send a gentle reminder. If they do not respond after 24 hours, click "Reject/Cancel". The locked stock will be instantly restored to your storefront.
Q: Can I change delivery fees or offer free shipping above ¹999?	A: Yes! Go to /admin/settings. Under "Shipping & Order Rules", update "Default Flat Delivery Charge" and "Free Delivery Above". Click Save. It updates instantly.
Q: Can I change my store phone number, Instagram handle, or about story?	A: Yes! Everything in your boutique is editable in /admin/settings. Nothing is hardcoded.
Q: A customer wants to track their parcel. Where do they go?	A: Direct them to your website's /track-order page. All they need to enter is their order number (e.g. VCG-2026-0001) and their 10-digit phone number. They will see the 6-stage milestone tracker.
Q: Do I need to keep my laptop open for the shop to work?	A: No! Your storefront is hosted on Vercel and your database on Supabase. Both run 24/7 in the cloud even when your laptop is turned off.

Ø<ß8 Heartiest Wishes for Vedanya Craft Ghar!

Your dedication to handmade crafts brings beauty and warmth to every home.
